

The Product Guide to **Wood Fence**

We use #1 Grade 100% Cedar. It is naturally resistant to rotting and decay, and therefore requires no chemical treatment. Only cedar wood has the distinct aging quality of weathering over time to a desirable silver gray color. Other woods tend

to blacken and look rotted as they age. Custom cedar wooden fencing is a good choice for your yard, pool, garden, pet containment, or just to divide your property line, and is environmentally friendly and natural.
